CUSTOMER
SATISFACTION

OUR PRODUCT YOUR SOLUTION

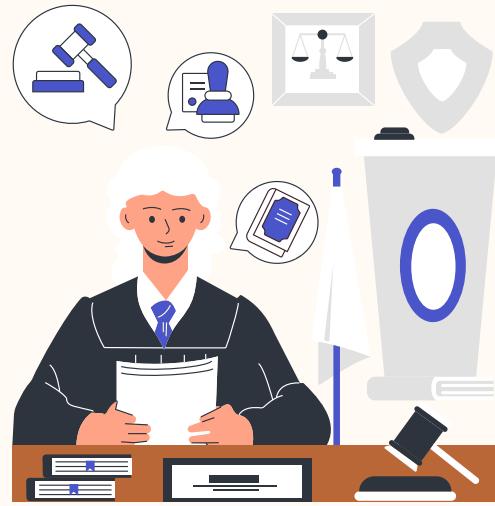

HRMS (HUMAN RESOURCE MANAGEMENT SYSTEM)

Human Resource Management System automates HR processes including payroll, attendance, and performance management, enhancing efficiency and compliance. It streamlines employee data management, supports strategic HR decisions, and improves overall productivity.

HMS (HOSPITAL MANAGEMENT SYSTEM)

Hospital Management System integrates patient registration, electronic medical records, and billing to streamline hospital operations and improve patient care. It ensures accurate, timely information flow and reduces administrative burdens across departments.

LEGAL MANAGEMENT

Legal Management software supports case management, document storage, and billing, enhancing efficiency and accuracy in legal practices. It allows legal professionals to focus on delivering high-quality services with streamlined administrative tasks.

PROPERTY MANAGEMENT

Property Management software handles lease tracking, tenant management, and financial reporting, optimizing real estate portfolio performance. It enhances operational efficiency, tenant satisfaction, and transparency in property management.

OUR PRODUCT YOUR SOLUTION

SCHOOL MANAGEMENT SOFTWARE (EDU-FEST)

EDU-FEST automates school operations like enrollment, attendance, and grade reporting, boosting administrative efficiency. It enhances student and teacher productivity and fosters better communication with parents.

ATTENDANCE

Attendance software automates employee attendance tracking, integrating seamlessly with payroll and HR systems. It ensures accurate timekeeping, reduces administrative overhead, and enhances workforce management.

HIGH COURT

High Court software streamlines case management, document handling, and judicial workflows for high courts. It enhances efficiency and accuracy in legal proceedings and administrative tasks.

SERVICES WE PROVIDE

Cloud Migration, Maintenance & Deployment

Data Center Operations

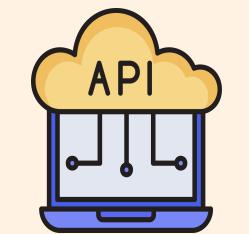

Staffing Consultancy & IT Recruitment

Web Application Development

Mobile Application Development

Enterprise Application Integration

Web Based Community Solutions

Security Solutions

OUR SERVICES

Cloud Migration, Maintenance & Deployment

Cloud migration, maintenance, and deployment involve moving applications, data, and workloads to a cloud environment, ensuring their continuous performance and security, and efficiently launching updates or new services. This process enhances scalability, reduces IT costs, and improves operational flexibility for businesses.

Security Solutions

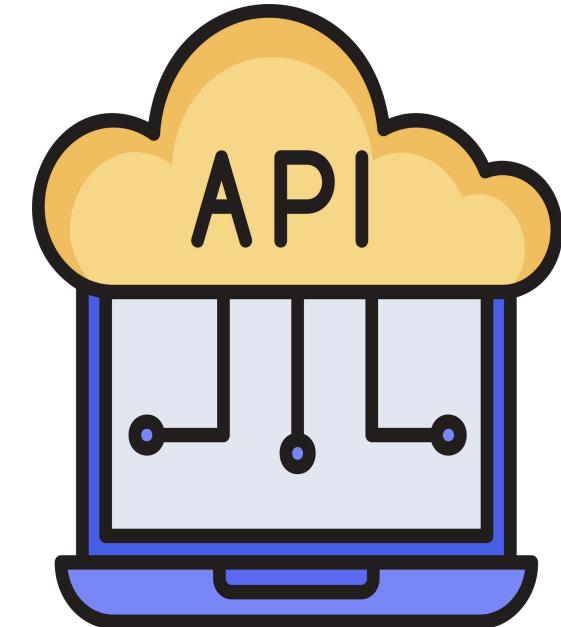

Security solutions encompass a range of technologies and practices designed to protect systems, networks, and data from cyber threats. They include firewalls, antivirus software, intrusion detection systems, and encryption, ensuring robust defense against unauthorized access and data breaches.

OUR SERVICES

Enterprise Application Integration

Enterprise Application Integration (EAI) involves connecting different enterprise systems and applications to enable seamless data exchange and process automation. EAI enhances operational efficiency, reduces redundancy, and improves real-time access to information across an organization.

Data Center Operations

Data center operations involve managing and maintaining the infrastructure, systems, and processes within a data center to ensure continuous, efficient, and secure IT service delivery. This includes overseeing hardware, software, networking, power, cooling, and security measures to support an organization's data processing and storage needs.

OUR SERVICES

Web Based Community Solutions

Web-based community solutions are platforms designed to facilitate online interactions and collaborations among members of a community. It provides tools for communication, content sharing, event management, and networking, enhancing engagement and connectivity within the community.

Staffing Consultancy & IT Recruitment

Staffing consultancy and IT recruitment services specialize in finding and placing qualified candidates in IT roles. These services include sourcing, screening, and matching talent to meet the specific needs of organizations, ensuring they have the skilled professionals required to support their IT operations and growth.

OUR SERVICES

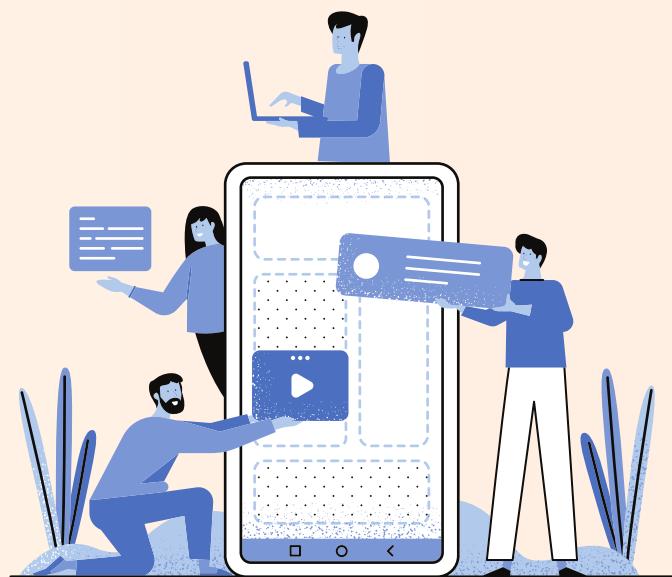

Web Application Development

Web application development involves designing, building, and maintaining web-based applications that run on internet browsers. It encompasses front-end and back-end development, focusing on creating functional, user-friendly applications that meet specific business needs and provide a seamless online experience. Our team has developed several web app products, including HRMS, HMS, Legal Management, Property Management, and School Management Software (EDU-FEST).

Mobile Application Development

Mobile application development involves creating software applications specifically for mobile devices, such as smartphones and tablets. It includes designing and coding apps for iOS, Android, or cross-platform environments, focusing on delivering a responsive, intuitive user experience and integrating with device features. Our team has developed several mobile app products, including High Court ESIC AAA+, Urban Forest, RTA M-Vallet, and Attendance.
