

AUDITING WITH PRECISION, SERVING THE NATION WITH INTEGRITY

The General Court of Audit (GCA) is the supreme audit authority of Saudi Arabia, operating as an independent body reporting directly to the King.

GCA ensures the proper management and protection of public funds by auditing state revenues, expenditures, and assets. It also enforces compliance with financial and administrative regulations while overseeing the performance of government entities.

GCA audits a wide range of bodies, including ministries, government departments, municipalities, public institutions receiving state funds, and private entities where the state holds a stake or guarantees profits (as per Royal Decree). Additionally, any organization can be audited upon Royal Order, ensuring transparency, accountability, and financial integrity across the Kingdom's public sector.

JOB DESCRIPTION

Job Title: Data Analyst

Department: IT Team

Reports To: Project Head

Location: Riyadh, Saudi Arabia (GCA Office)

Benefits: 200000 SAR Annual + Health Insurance + Annual Bonus + Visa

Overview:

The General Court of Audit (GCA) is undergoing a significant IT transformation to enhance financial oversight and improve efficiency. The IT Transformation Team seeks a highly motivated Data Analyst to analyze large datasets of financial information, identify trends and anomalies, and provide actionable insights that support auditing processes. This role will involve working with a team to build data pipelines, develop analytical models, and create visualizations that empower auditors to make more informed decisions.

Responsibilities:

- Collect, clean, and analyze large datasets from various sources (e.g., government databases, financial institutions) using statistical techniques and data mining tools.
- Develop and maintain data pipelines to extract, transform, and load (ETL) data into analytical platforms.
- Identify trends, patterns, and anomalies in financial data that may indicate irregularities or areas for further investigation.
- Design and develop statistical models to predict financial risks, detect fraud, and optimize auditing processes.
- Create clear and concise data visualizations (e.g., dashboards, reports) to communicate findings to auditors and other stakeholders.
- Collaborate with business analysts, auditors, and IT professionals to understand data requirements and translate them into analytical solutions.
- Document data sources, methodologies, and findings to ensure transparency and reproducibility.
- Stay abreast of emerging data analytics technologies and best practices to continuously improve the team's capabilities.
- Contribute to the design and implementation of data governance policies and procedures to ensure data quality, security, and compliance.
- Participate in Agile development processes, including sprint planning, daily stand-ups, and retrospectives.
- Ensure compliance with GCA's security policies and regulations regarding data handling.

Qualifications:

- Bachelor's degree in Statistics, Data Science, Computer Science, Economics, or a related field.
- Minimum 1+ years of experience in data analysis and statistical modeling.
- Proficiency in SQL and experience with relational databases (e.g., PostgreSQL, MySQL).
- Strong analytical and problem-solving skills with a keen attention to detail.
- Excellent communication and presentation skills, with the ability to explain complex data insights to non-technical audiences.
- Experience creating data visualizations using tools like Power BI.
- KSA HRD Council accredited "Power BI Data Analyst Associate" certification is mandatory due to Project compliance.
